Retention: in Ontario, pharmacy patient and dispensing records must be kept at least 10 years (O. Reg. 264/16 s. 21). Federally, at least 2 years, under a separate regulation for each class of drug: narcotics (Narcotic Control Regulations s. 40.1), Part G controlled drugs (Food and Drug Regulations s. G.03.010), and targeted substances (Benzodiazepines and Other Targeted Substances Regulations s. 75).

Cadence: the Ontario College of Pharmacists expects narcotics and controlled substances to be reconciled at least every six months. Nova Scotia and Prince Edward Island are stricter, reconciling narcotics and controlled drugs monthly. Alberta, British Columbia, Saskatchewan, Manitoba, and Newfoundland & Labrador generally require reconciliation every three months.

General information, not legal or professional advice. Confirm the current requirements with your provincial college and Health Canada.
